**Re: L0971900047 Lake Co.
Waukegan Coke Plant Phase II RI
Superfund/Technical**

Dear Mr. Bolen:

The IEPA concurs with the letter of June 30, 1993, containing Barr Engineering Company's response to Agency comments on the April 1993 Phase I Technical Memorandum. As per this document and the telephone conversation between Jim Langseth, of Barr, Tracey Fitzgerald and Jerry Willman of IEPA, and yourself, the IEPA has notified Barr Engineering that a POTW permit is required, and understands that Barr is in the process of obtaining such a permit. Jim Langseth of Barr indicated that field operations are being planned and will proceed regardless of the POTW permit applications' status.

Please contact me with any questions regarding this letter.

Sincerely,

Gerald E. Willman

Gerald E. Willman
